

# Companies using the IBM iSeries & System i

Why do 98% of Fortune 100 companies use iSeries and System i?

- reliable: better than Windoze or Unix
- cost effective: lower Total Cost of Ownership than Windoze or Unix systems
- scalable: from departmental server to enterprise mainframe
- state of the art: all 64 bit since 1995, now on 8th generation RISC processor — world's fastest commercial processor.
- investment protection: 20 year old software runs, without modification, porting, or even recompiling, in 64 bit mode.

If you were born in Ontario after 1980, your birth record is in a System i computer.

## Distribution and Manufacturing

**Microsoft** ([yes they do! no we don't! yes they do!](#))
